Benefit Claimants

The Department for Work and Pensions (DWP) plans to move all legacy benefit claimants to Universal Credit by March 2026, completing the rollout and closing all legacy benefits by this date.

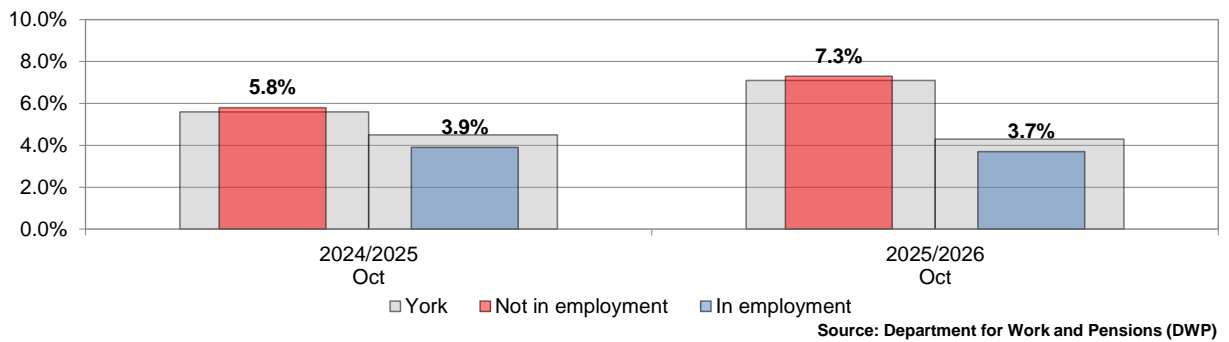

Legacy benefits include Income-based Jobseeker's Allowance (JSA), Income-related Employment and Support Allowance (ESA), Income Support, Housing Benefit, Child Tax Credit, and Working Tax Credit.

- The DWP has reported that all claimants of Income Support, income-based Jobseeker's Allowance (JSA), Housing Benefit and Tax Credits have already moved to Universal Credit.
- The DWP has reported that all claimants of income-related Employment and Support Allowance (ESA) only, or income-related ESA and Housing Benefit will have moved to Universal Credit by March 2026.

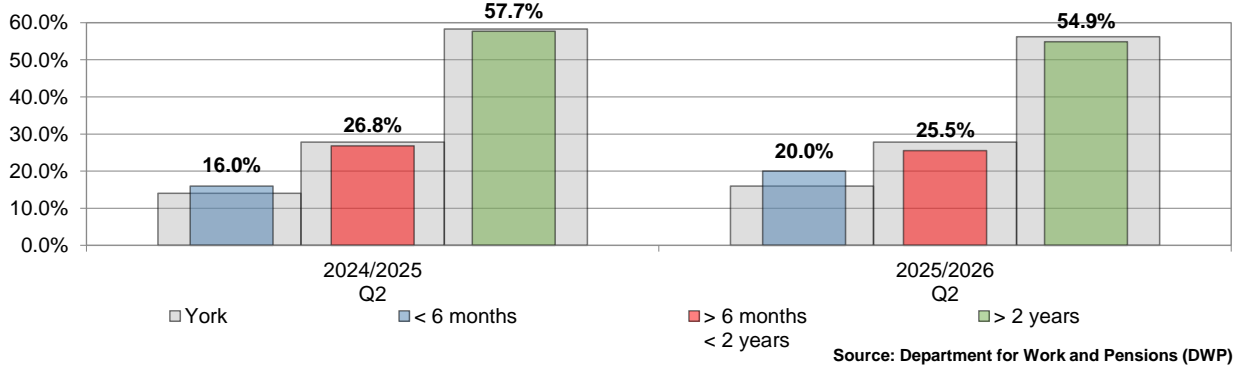

Universal Credit claimants - In Guildhall there are 1,316 claimants as at 2025/2026 Q2 (an increase from 1,174 in Q2 2024/2025). This is 10.8% of the working age population.

Universal Credit - Conditionality Regime

Conditionality means work-related activities a claimant will have to do in order to get full entitlement to Universal Credit.
Each person will be assigned one of six conditionality regimes (below) based on their assessed capability and circumstances.

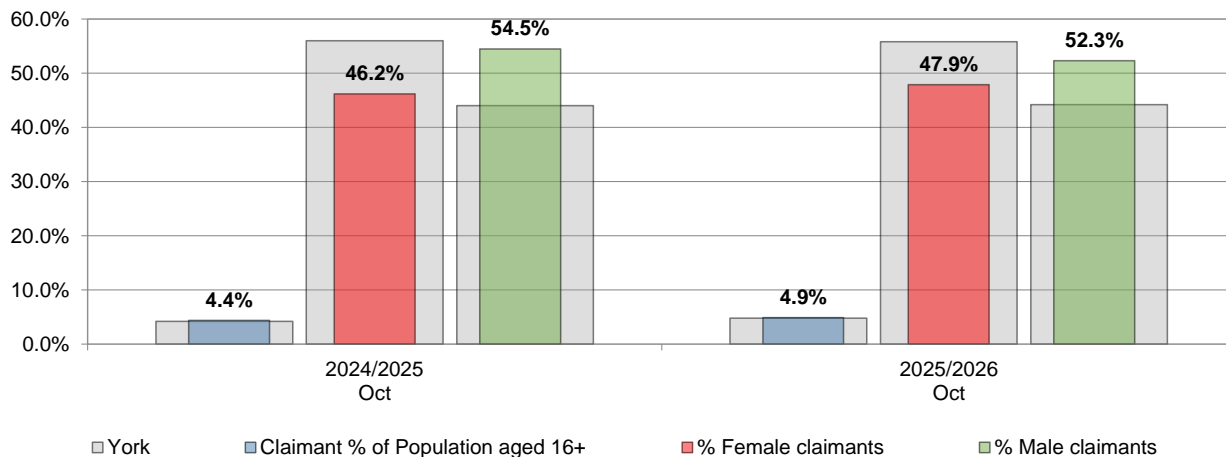

As circumstances change claimants will also transition between conditionality regimes.

Conditionality Regime	Description
Searching for work	Claimant is required to take action to secure work - or more / better paid work. The Work Coach supports them to plan their work search and preparation activity.
Working - with requirements	In work but could earn more, or not working but has a partner with low earnings
No work requirements	Not expected to work at present. Health or caring responsibility prevents claimant from working or preparing for work.
Working - no requirements	Required to inform DWP of changes of circumstances, particularly if at risk of decreasing earnings or losing job.
Planning for work	Claimant required to attend periodic interviews to plan for their return to work.
Preparing for work	The claimant is expected to take reasonable steps to prepare for work including Work Focused Interview.

Personal Independence Payment (PIP)

(generally for individuals aged 16+ who have a long-term illness, health condition, or disability that makes it difficult to carry out everyday tasks or get around)

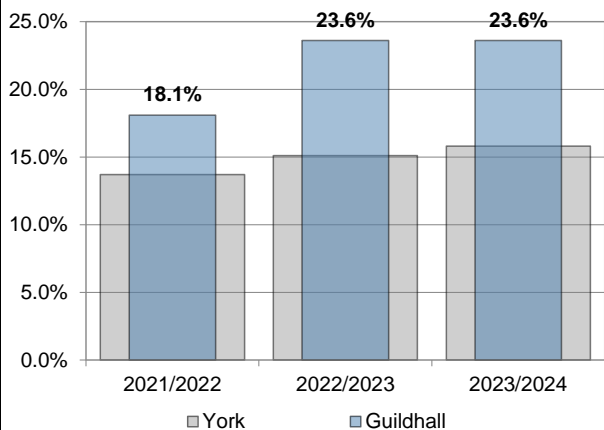

In Guildhall there are 679 PIP claimants as at Oct 2025
 (an increase from 611 in Oct 2024).

Source: Department for Work and Pensions (DWP)

Poverty

Child Poverty

The proportion of children (under 16) who are living in families whose reported income is less than 60 per cent of UK median income

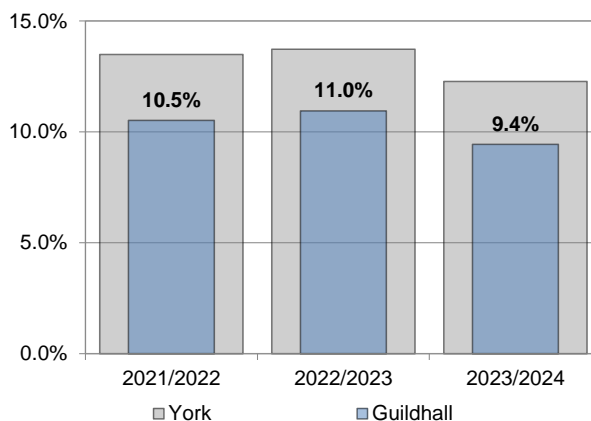

Source: Department for Work and Pensions

Fuel Poverty

This is measured using the Low Income Low Energy Efficiency (LILEE) indicator. Under this indicator, a household is considered to be fuel poor if:

- they are living in a property with a fuel poverty energy efficiency rating of band D or below; and
- when they spend the required amount to heat their home, they are left with a residual income below the official poverty

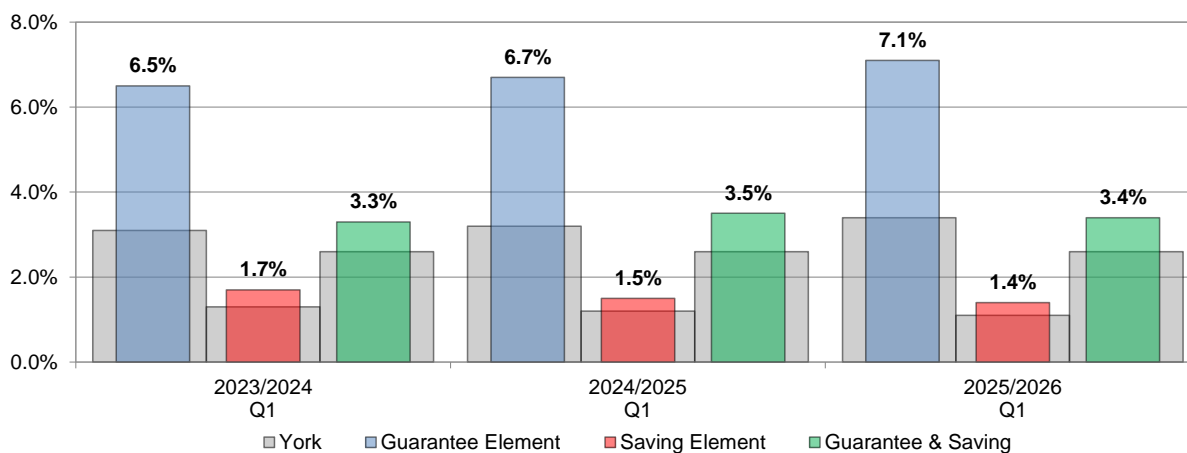

Source: Department for Energy Security & Net Zero

Pension Credit

Pension Credit is a benefit designed to help people over State Pension age with a low income. It provides a top-up to their weekly income, ensuring it reaches a guaranteed minimum level.

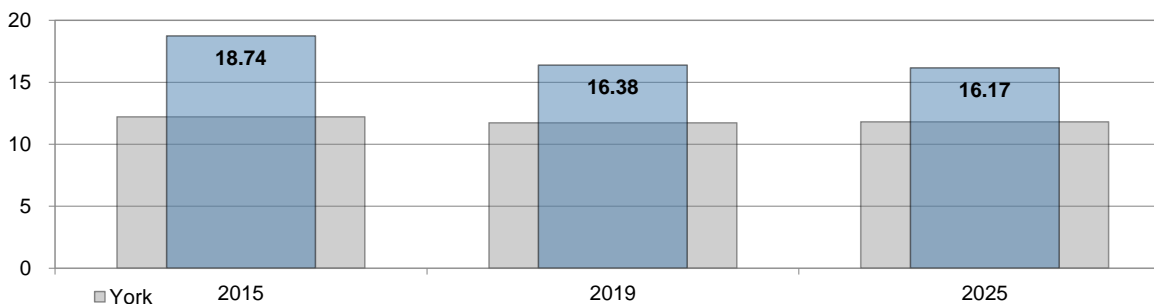

It's separate from the State Pension and can also open the door to other benefits and support.

Hospital Admissions

Emergency hospital admissions for injuries resulting from a fall (over 65), per 1,000 population

Falls data: the figures given here are taken from Hospital Episode Statistics data, which takes the number of those aged 65 or over being admitted to hospital on a non-elective basis at least once in each year as a result of a fall and divides it by the number of those of that age group resident in each ward to give a rate per 1,000 population.

Adult Social Care

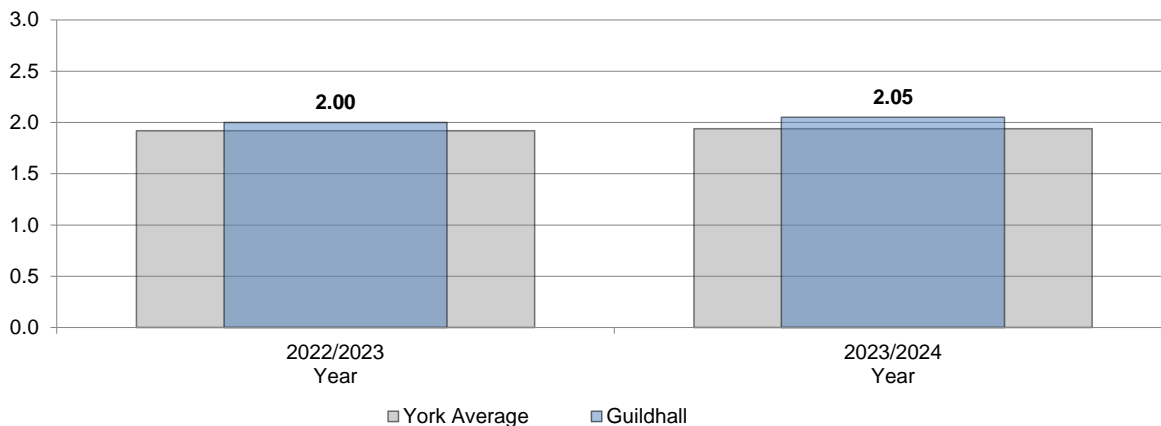

Social isolation

Social isolation: This is based on respondents to two questions on the Adult Social Care Survey regarding social contact and how time is spent.

A score of 1 indicates that the respondent has plenty of social contact and that they spend their time doing things they enjoy

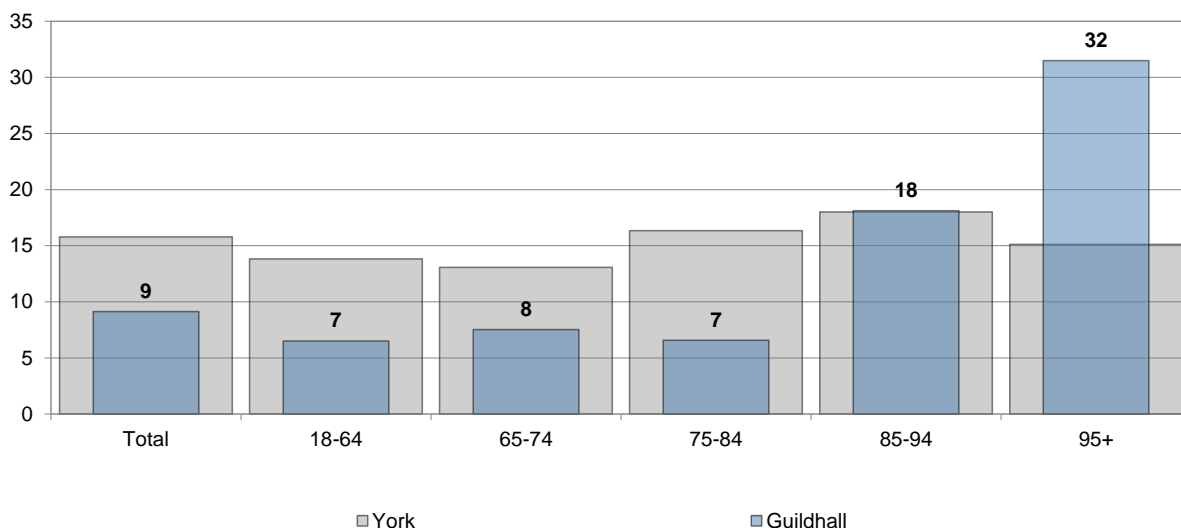

A score of 4 indicates that the respondent feels socially isolated and that they don't feel they do anything of value with their time.

The mean of all respondents' responses to both questions is the score presented here.

Road Condition Survey 2024-2025

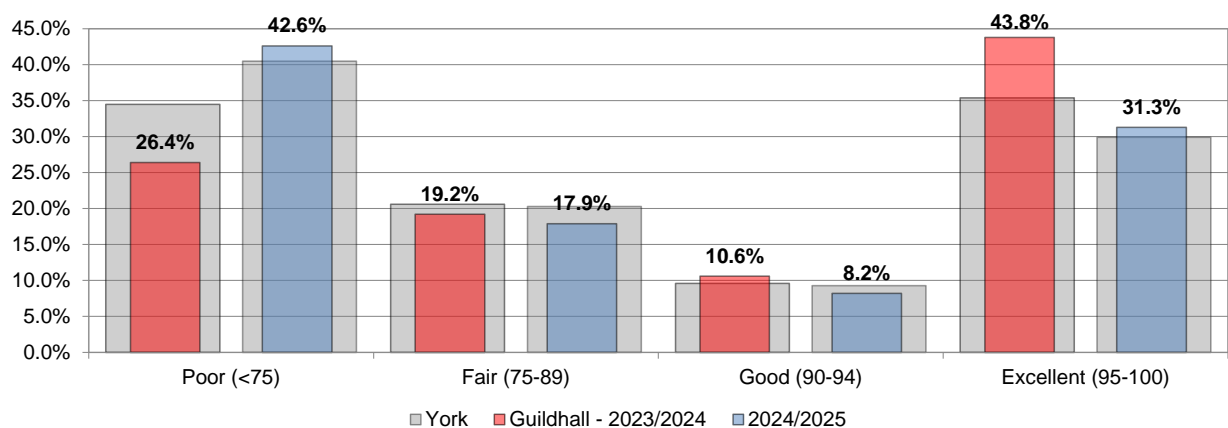

The data published within this resource represents an ongoing dataset of automated surface condition surveys which are carried out by the City of York Council (CoYC) in order to provide an element of the information required to prioritise schemes and help to extend the life of the UK's public infrastructure assets.

The data shown here is for road condition surveys captured within a financial year i.e. 2024/25 is for surveys between 1st April 2024 and 31st March 2025. The data published is used within wider analysis carried out by the Highways department, to help prioritise schemes to ensure more effective maintenance of highways, as well as to monitor and improve on previous maintenance techniques.

This data is provided within a spreadsheet, but can also be viewed as a map base on the Council Yorkview platform. A simple explanation of the methodology is that each section of road that has been able to be surveyed is given a score out of 100 and the mean score is for each street is calculated out of those road section scores. Roads may have been surveyed multiple times over the course of the year.

The road condition scores are then split into four general categories:

- Excellent (95-100)
- Good (90-94)
- Fair (75-89)
- Poor (<75)

The data contains records which appear to be duplicated in this dataset, where a street has two road condition scores in the same ward. This is because a street can have multiple USRNs (unique street reference number) which is used to calculate the street road condition score, however City of York Council can't publish the USRN alongside this data giving the appearance of duplicated records. Each section of road is assigned a ward based on which ward the middle of the road segment is in, so there will also be multiple scores for roads if the road crosses over a ward boundary. This can be seen on YorkView.

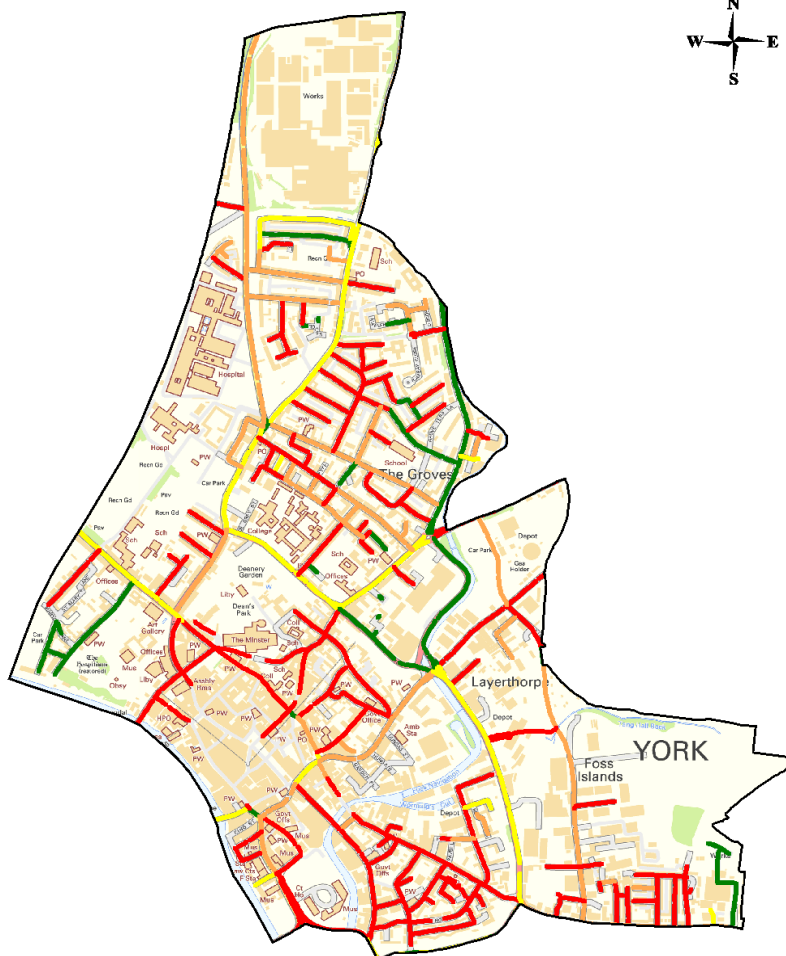

It should be noted that condition data is collected covering the full CoYC road network with a condition score produced for every 10m length of carriageway surveyed. The process of averaging the data to align with the USRN does distort the Yorkview output meaning that the red/poor condition band is over represented. The Yorkview data does provide a good coarse visual guide to the condition of any particular street although the original 10m data is used for all analysis within our Asset Management Systems.

Previous road condition data pre-March 2022 has been taken down as the supplier for the road condition data for 2022/23 and 2023/24 uses a different methodology to previous road condition data published 2016-2021.

Broadband coverage and speeds

In March 2017 the UK Government introduced the Universal Service Obligation (USO) for broadband as part of its commitment in the UK Digital Strategy to ensure that the UK has world-class digital connectivity and inclusion.

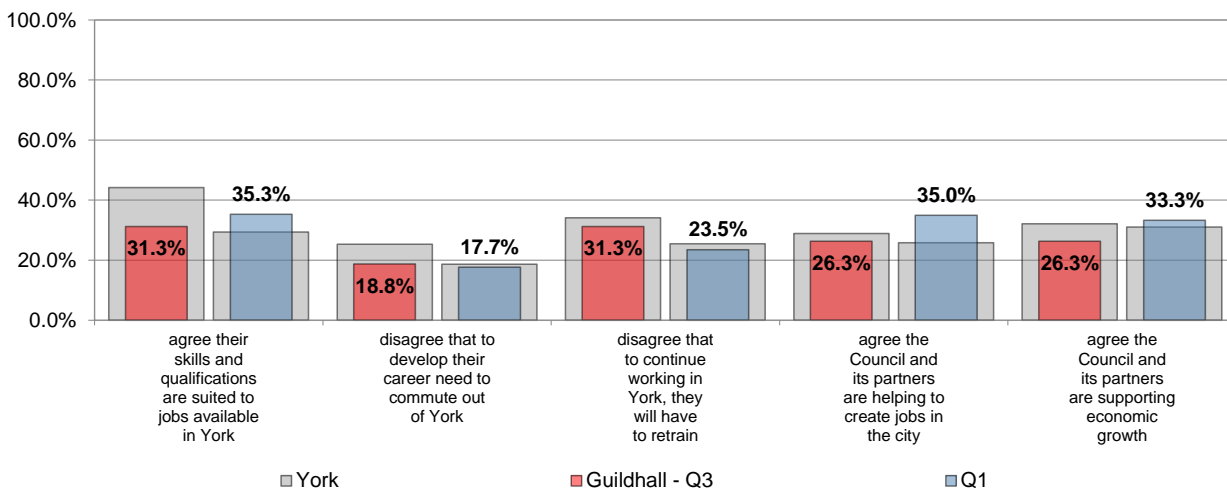

Measure	Guildhall	York	Summary
Superfast broadband availability	87.87%	98.34%	worse than the York average
Connections receiving:			
slowest speeds (under 2 Mb/s)	0.00%	0.03%	lower than the York average
slower speeds (under 10 Mb/s)	0.05%	0.19%	lower than the York average
superfast speeds (over 30 Mb/s)	94.31%	98.44%	lower than the York average

This data is based on analysis of Ofcom's Connected Nations data for 2025/2026. Ofcom collected and analysed data from major fixed telecoms operators (BT, Virgin Media, Sky, Talk Talk, Vodafone and KCOM). Due to variations in broadband performance over time, Ofcom cautions that the data should not be regarded as a definitive but rather a snapshot of current variation in availability across the country. The coverage of gigabit-capable broadband networks – which includes hybrid fibre coaxial (HFC) cable in addition to full fibre – has grown to reach 86% or 25.9 million residential premises in the UK by January 2025. Based on this interim update, the Government's target of 85% coverage by 2025 is on track to be met.
